An Auto-Carrier for the Modern Era

N

Amtrak

America's Longest Passenger Train

First brought into service under Amtrak supervision in 1983, the Auto Train has since expanded and refinied its service, operating in consists of often more than 40 cars (including anywhere from 20-30 of these Aluminum Autorack cars). With two of these nearly mile-long trains operating simultaneously on a daily basis, the Auto Train is one of America's, if not the world's, longest operating passenger trains.

Pairing these new N scale cars with Kato's N scale Superliner releases and P42 locomotive, modelers will be able to build their own Auto Train consists in the comfort of their own home!

Canadian Born and Bred

The Aluminum Autorack was introduced in 2004 in Canada, where the enclosed and rust-resistant Aluminum body provided a greater resistance to the elements for the cars carried inside.

CN

CP

Canadian versions of these Autoracks are physically identifiable as different from their Amtrak counterparts by the scores of tiny perforations that stretch all across the sides of the car's body - printed in meticulous detail on this new Kato model.

New N Scale Autoracks - in hobby stores February 2014!
