## EMD SD80MAC locomotives Gunderson MAXI-IV Articulated Well Cars

*If you're looking for an HO locomotive that can really throw its weight around, then look no further!*

The HO EMD SD80MAC from Kato is one of the heaviest, strongest pulling workhorses that you could add to your layout. Coupled with the latest release of Kato's HO Gunderson MAXI-IV well cars - three-unit articulated, smooth rolling cars with metal wells - the EMD SD80MAC is set to conquer the hills and valleys of your home layout - and thanks to the broad range of motion on the trucks and a minimum turning radius of 18", they're ready to conquer the corners and curves, too, despite being one of the longest prototype diesel locomotives in existence!

### HO EMD SD80MAC Freight Locomotive

- Heavy weight for maximum traction - one of Kato's heaviest locomotives!
- DCC friendly with an 8-pin quick plug for easy and worry-free DCC installation.
- Directional headlights and all-wheel electrical pickup round out some of the locomotive's many features.
- Clear, detailed diagrams outline the exact placement for the many sharply molded customer applied hand rails and grab irons.

Find the HO EMD SD80MAC and other Kato HO products at your local hobby shop!

Item #37-6372	<b>NEW</b> HO EMD SD80MAC CSX "Dark Future" #4592	\$195 MSRP
