# Amtrak's Latest on your Layout!

With the latest release of the N Scale GE P42 "Genesis" from Kato USA, Amtrak's current lineup of locomotives is now complete with the latest iteration of its current "wave" scheme, the modified phase V (Vb). With a lowered red sill stripe and revised label placement, this newest release from Kato represents the most current look of Amtrak's staple locomotive, making it a perfect option for modelers looking to represent modern era passenger service!

Also available is a complete lineup of Amtrak 40th Anniversary P42 locomotives - representing each of Amtrak's past paint eras, from the all-red nosed Phase I to the broad stripes of the Phase II and III, and the more stylishly patterned Phase IV, each locomotive was specially decorated as a celebration of America's Passenger Railroad's colorful history, and all four are used today alongside Amtrak's Phase Vb locos in day to day passenger service!

Enjoy all of Amtrak's current schemes in N scale!
