

For N & HO  
DC Layouts!

# Enjoy BIG Sound without the need for DCC - Operated with your phone or tablet!

- 🔊 **Works with both HO and N scale** - *The modular pass-through design of the Analog Sound Box means that it works on any DC layout, no matter the size or configuration!*
- 🔊 **Choo-choo-choose your sounds** - *The Analog Sound Box comes with an included Early EMD 1st Generation Diesel sound chip, with additional sound cards sold separately for multiple sound selections!*
- 🔊 **Smart Back-EMF reading** - *The sound box doesn't just make noise - it will read the effort of the motor in your engines to know how hard they're working. Certain sounds will self-adjust the sound based on the speed of the locomotive so what you hear will match what you see, all without the need for DCC!*
- 📶 **Bluetooth control** - *Now, with the new "Smart Device Controller", you can operate your layout with the swipe of your finger! Compatible with the Sound Box or capable of operating alone, the "Smart Device Controller" and free companion app from Kato makes operating your layout easier than ever!*

#22-019	<b>Smart Device Controller for Bluetooth control (works with or without Soundbox)</b>	<b>\$170.00 MSRP</b>
#22-082	Kato Power Supply - 12V (N Scale Use)	\$25.00 MSRP
