Rediscover the Southern Pacific Lines

KATO
 PRECISION RAILROAD MODELS

The Southern Pacific's Premier Named Train

This year, one of Kato's most celebrated named train releases will make a triumphant return to the market with a brand new lettering scheme and accompanied by a new release of the gorgeous Lima Locomotive Works GS-4 steam locomotive!

Lettered in "Southern Pacific Lines" lettering, representing the train as it was first built, the "Morning Daylight" includes numerous unique cars, such as the three-unit articulated coffee shop-kitchen-diner, and the articulated coaches that made up the bulk of the train.

Pulling the Morning Daylight will be a new production of the Southern Pacific Lines GS-4 Steam Locomotive. This powerful engine is more than capable of hauling a full 18-car consist (possible to assemble through the use of multiple 2-car add-ons and the available optional 11-660 Coach decal set) on a grade. Look for the Daylight and new GS-4's at your local hobby store Today!
