

N

Harkening back to the 1940's and 50's, an era where freight locomotives were treated with the same reverence as passenger units when it came to lavish and eye catching paint schemes, Kato USA announces four road names of early F-units to recapture this golden age of freight railroading!

These two-packs of EMD F2 locomotives each come with a pair of individually powered, DCC friendly locomotives, available in this body style for the first time from Kato USA in over 20 years! Modelers can use these locomotives to pull Kato's 106-6275 (N) Mixed Freight Train set or utilize them with their existing fleet of freight cars or FT locomotives for prototypical operations!

*Recapture the golden age of freight railroading!*

| Item #   | Description  | MSRP  |
