

EMD SD70MAC

New for 2018! Kato USA is re-releasing the perennial favorite - the EMD SD70MAC, in **Alaska Rail Road** and **BNSF "Swoosh" modern paint!** Available in two different body styles with two differing headlight arrangements, these locomotives are available now in your local hobby shop both as standard DC (Analog) engines and with **Kato-installed Ready-to-Run DCC!**

Looking for some rolling stock? The BNSF SD70MAC is a perfect match for the also-available **Bethgon Protein Gondolas!** These specialized cars are used to run high-priority feed trains on the BNSF lines across the Southwestern United States, and will make an excellent complement to modelers' existing intermodal or freight consists!

*BNSF "Swoosh" w/
Cab Headlight + Early Trucks*

*Alaska Rail Road w/
Nose Headlight + Late Trucks*

Kato's Protein Gondolas come eight to a package and have removable covers, allowing modelers to operate them however they desire!
