

## EASTERN MUSCLE WITH UNIVERSAL APPEAL

**Long out of production, the original “Conrail Cadillacs” are returning to HO Scale!** Originally produced for Conrail, the EMD SD80MAC was a 5000 horsepower (700 more than the SD90/43MAC), 20 cylinder diesel behemoth. Following the division of Conrail, its fleet of 30 SD80MACs were divided among Norfolk Southern and CSX, both of whom still use these locomotives to this day when “heavy lifting” is required.

### HO EMD SD80MAC Freight Locomotive

- Heavy weight for maximum traction - one of Kato's heaviest locomotives!
- DCC friendly with an 8-pin quick plug for easy and worry-free DCC installation.
- Directional headlights and all-wheel electrical pickup round out some of the locomotive's many features.
- Clear, detailed diagrams outline the exact placement for the many sharply molded customer applied hand rails and grab irons.
