

Legendary Locomotives - Legendary Paint Schemes

The SD70ACe is the latest in the line of EMD's "70" locomotives that is intended to cut railroad costs for maintenance by providing a locomotive that is more efficient and more powerful, lessening fuel costs and the total numbers of running units.

In 2012, to celebrate its 30th anniversary, Norfolk Southern painted a total of 20 locomotives (10 SD70ACe's) into commemorative schemes that honored the railroads that had merged over the years to form modern day NS.

The Kato SD70ACe has been retooled just for this occasion, with a redesigned cab section which replicates the isolated cab of NS's newest locomotives, as well as the distinctive "trident" shaped rooftop antenna array. Fully featured with exquisitely printed details all over the body and Kato's award winning N scale drive system (with a sophisticated "floating axle" truck which grants better pulling performance and electrical pickup than most traditional drives, even on less-than-ideal track conditions), this new run of SD70ACe's in Norfolk Southern's paint and body style is shipping with all 10 of the railroad's heritage ACe variations, as well as with two standard "Thoroughbred" scheme versions, all available before the end of the year!
